

The End of District 56 Technology

You are about to exit Gurnee School District 56 and enter Warren Township High School District 121. Some of the digital services and accounts you have been using here are owned and controlled by District 56 and some are owned and controlled by you. Here is a brief explanation.

Your **Google Drive** and **Gmail** (kid56.org) accounts are property of District 56. At some point over the summer, you will no longer be able to use these services under your current account. You can create a new account of your own in Google. Then you can download your current data and upload it to your new account, or share your current documents with your new account and control them using your new personal account. You can also log-in to a home computer using your current Google account and download your data to your home computer.

Your **Apple iTunes** and **App Store** accounts belong to you and will not be deleted. This includes your iCloud documents, photostream and iTunes U accounts. You can access your Apple account from any Apple computer or device and download any apps, music, etc, that you have purchased. Even though you are using your Gmail account as your login name and password, your Apple account will not be affected once you can no longer use that Gmail account. However, once you obtain a new email address, you should go into Apple ID account settings and change your email there because you will not be able to access your *kid56.org* account to use as a recovery email.
